Software Solutions
Enterprise Product Suite

SRIT Enterprise Product Suite consisting of Financial Management, Accounting Management, Budgeting & Planning, Supply & Procurement, Fixed Asset Management, Electronic Document Storage and Retrieval, CRM and Enterprise Asset Management (EAM) and Human Capital Management.
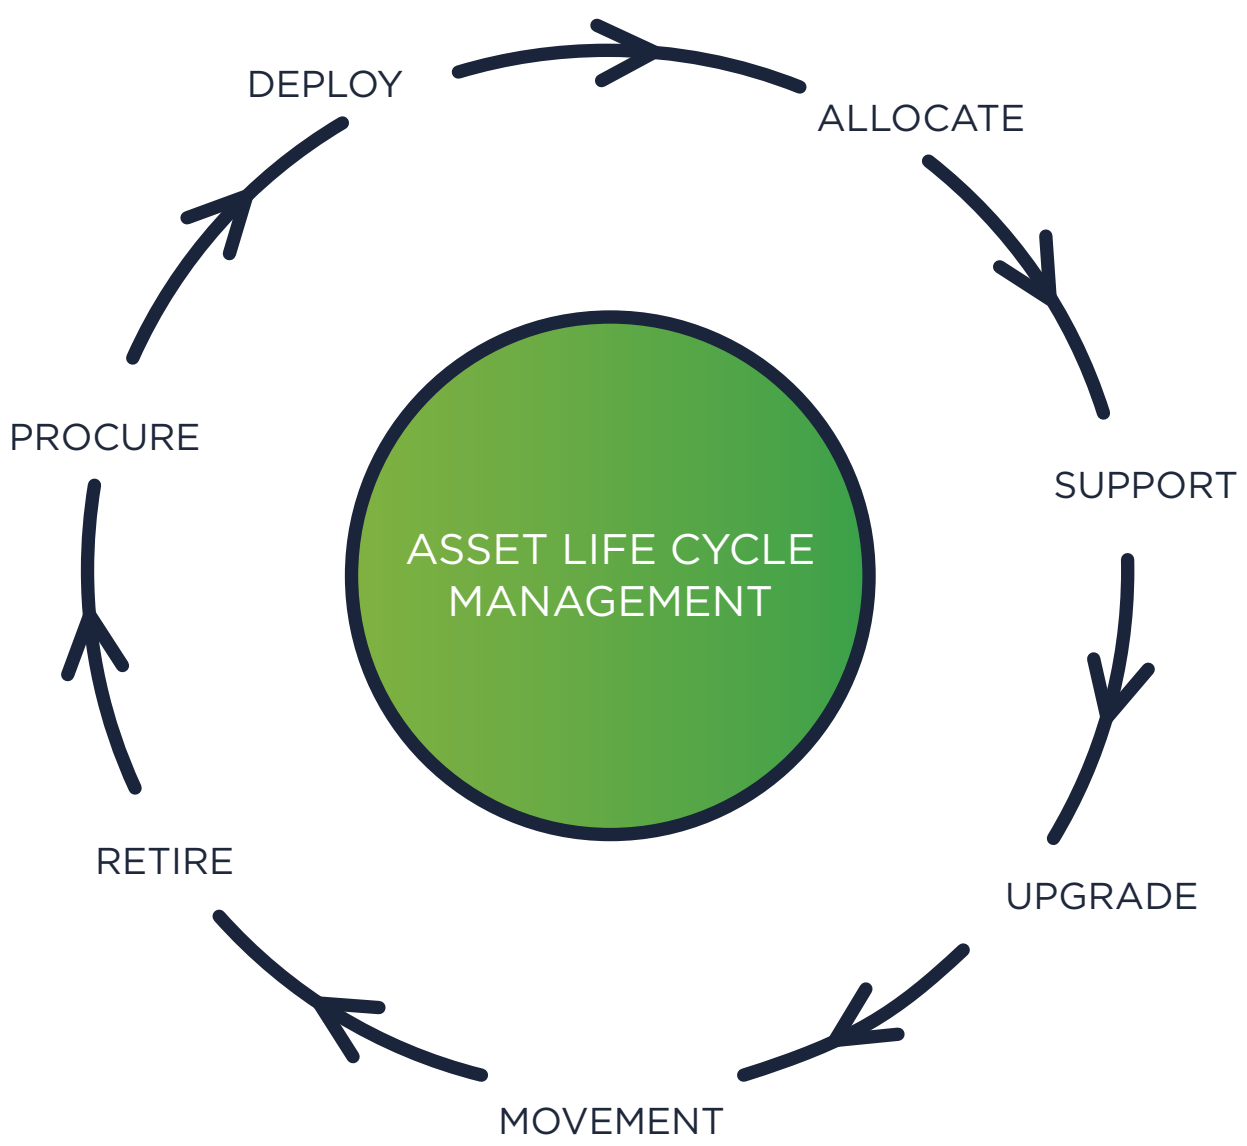

Enterprise Asset Management:

The significance of integrating the entire asset lifecycle, for improved planning capabilities and cost competitiveness, has impacted the perspective with which companies look at Asset Lifecycle Management today. The implementation of Asset Life-cycle Management enables high degree of integration of a company's IT assets with the departments involved, thereby, offering a wealth of time-saving options and significant cost-reductions. SRIT provides Asset Lifecycle Management solutions that encompass the entire lifecycle of assets starting from Asset Requisition through approval, budgeting, procuring, installation, maintenance and finally disposal.

The Enterprise Asset Management suite enables organizations to take complete control of their assets, be it IT Assets or Non IT Assets. Our unique software and hardware discovery tools take inventory of the networked assets automatically. The non IT Assets are tagged with either Barcodes or RFID. With information about all the assets under control, Asset Managers can then successfully manage their assets and effectively increase utilization. Meeting several Compliance norms such as SOX, BS7799, US GAAP or any country specific laws etc becomes easier for the CFO/CIO.

A configurable Workflow Engine powers you to define the Asset, Workspace & Procurement Processes, as required. The solution suite is modular in nature, comprising of a set of seamlessly integrated modules comprising the various stages of asset lifecycle management, which finds it application across diverse organizations. When combined with operational data, asset management system can help in evaluation of past purchasing decisions & assist in better future purchasing decisions.

The asset management suite is powered by our powerful Auto Discovery Tool. The discovery tool help discover IT assets (Hardware and software)such as Servers, Desktops, Laptops, Installed Software and also Maintain inventory of Processors, Hard disks, Memory, Monitor, CD Drives, FDD's, Keyboard, etc. It helps in enforcement of policies & standards and Compliance Reporting.

SRIT

CMMIDEV /5 [SM]
Exp. 2019-02-26 / Appraisal #26291

Since its inception in 1999, SRIT has strived for excellence and thoroughness in the IT sector, with the goal to harness the potential technology has to permeate an industry and transform it at every level. We focus on verticals where large-scale operations and process lifecycles can be streamlined via a single technology, thereby enabling that domain to accomplish expontentially more than it was previously capable of doing. As such our primary focus is on transforming industries such as healthcare, governance and telecom and automate them from start to finish, such that their benefits ripple out to a far greater number of people in a much shorter span of time.

We've been recognized as 2015's 'Brand of the Year' for Healthcare Managed Services by Silicon India. We are a CMMi DEV/5 company as well as the world's first SSE-CMM Level 5 assessed IT company.
